Current bibliography of urban history

NIGEL GOOSE

This bibliography is a continuation of and a complement to those published in the Urban History Yearbook 1974-91. It aims to provide comprehensive coverage of recently published British books and periodicals on urban history. It also includes an extensive selection of material published in French, Spanish and the United States, provided by our foreign correspondents. I am extremely grateful to all of the associates — Stuart Blumin, Pierre Cosío, Barry Haines, Paul Smith, David Sneath and José Luis Quijón — for their valuable contributions. No doubt we will have overlooked some items and I will gratefully receive notification of any omissions. The arrangements and format closely follow that of previous years; cross-references are provided where necessary, and there is an index of towns on pp. 483.

I General	III Physical structure
Research methods, aids and materials	Research methods, aids and materials
Urban history — definitions and historiography	Physical and structural characteristics of towns
Urbanization and the growth and fortunes of towns	Physical and structural characteristics of areas within towns
Empirical studies of town growth	Sites and buildings
